# INTRODUCTION

## GASUNIE

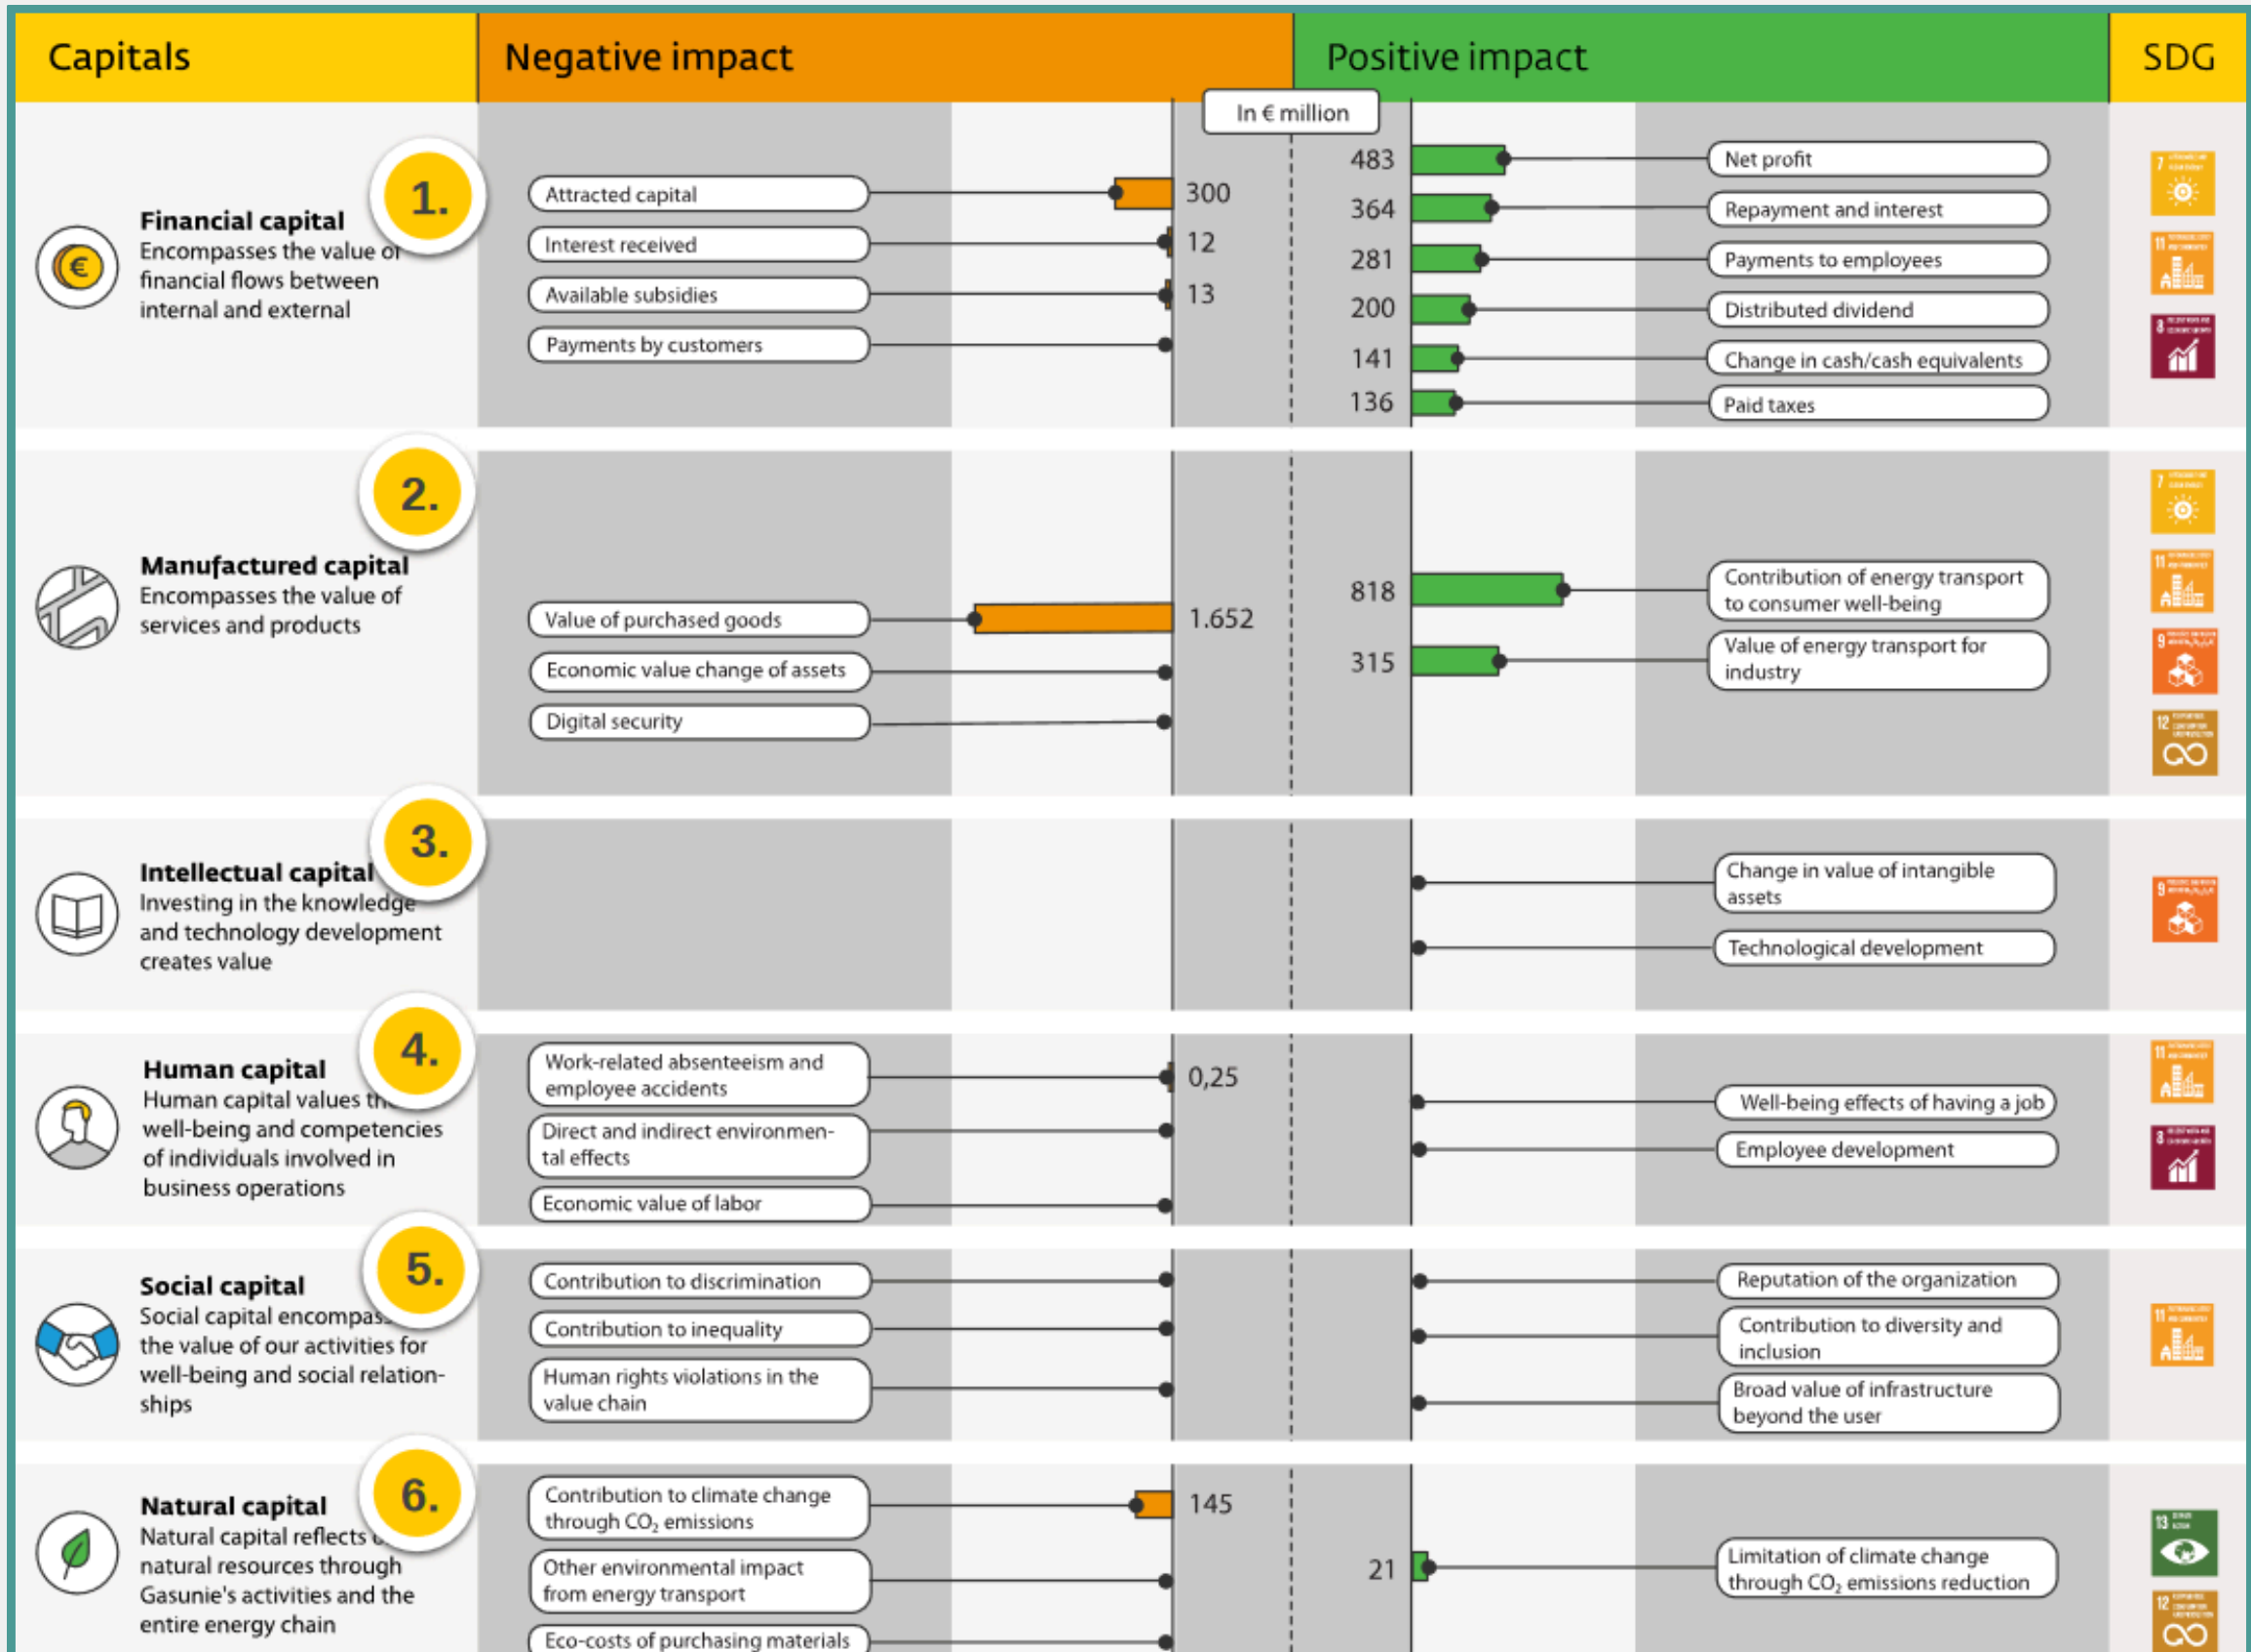

Gasunie manages energy infrastructure in north-western Europe, focusing on natural gas, CO2, and hydrogen amid the energy transition. They **prioritise fair access** to their services and are solely owned by the Dutch State.

In 2024, Gasunie published its first **Integrated Profit & Loss Statement** over the year 2023.

*Let's dive in* 

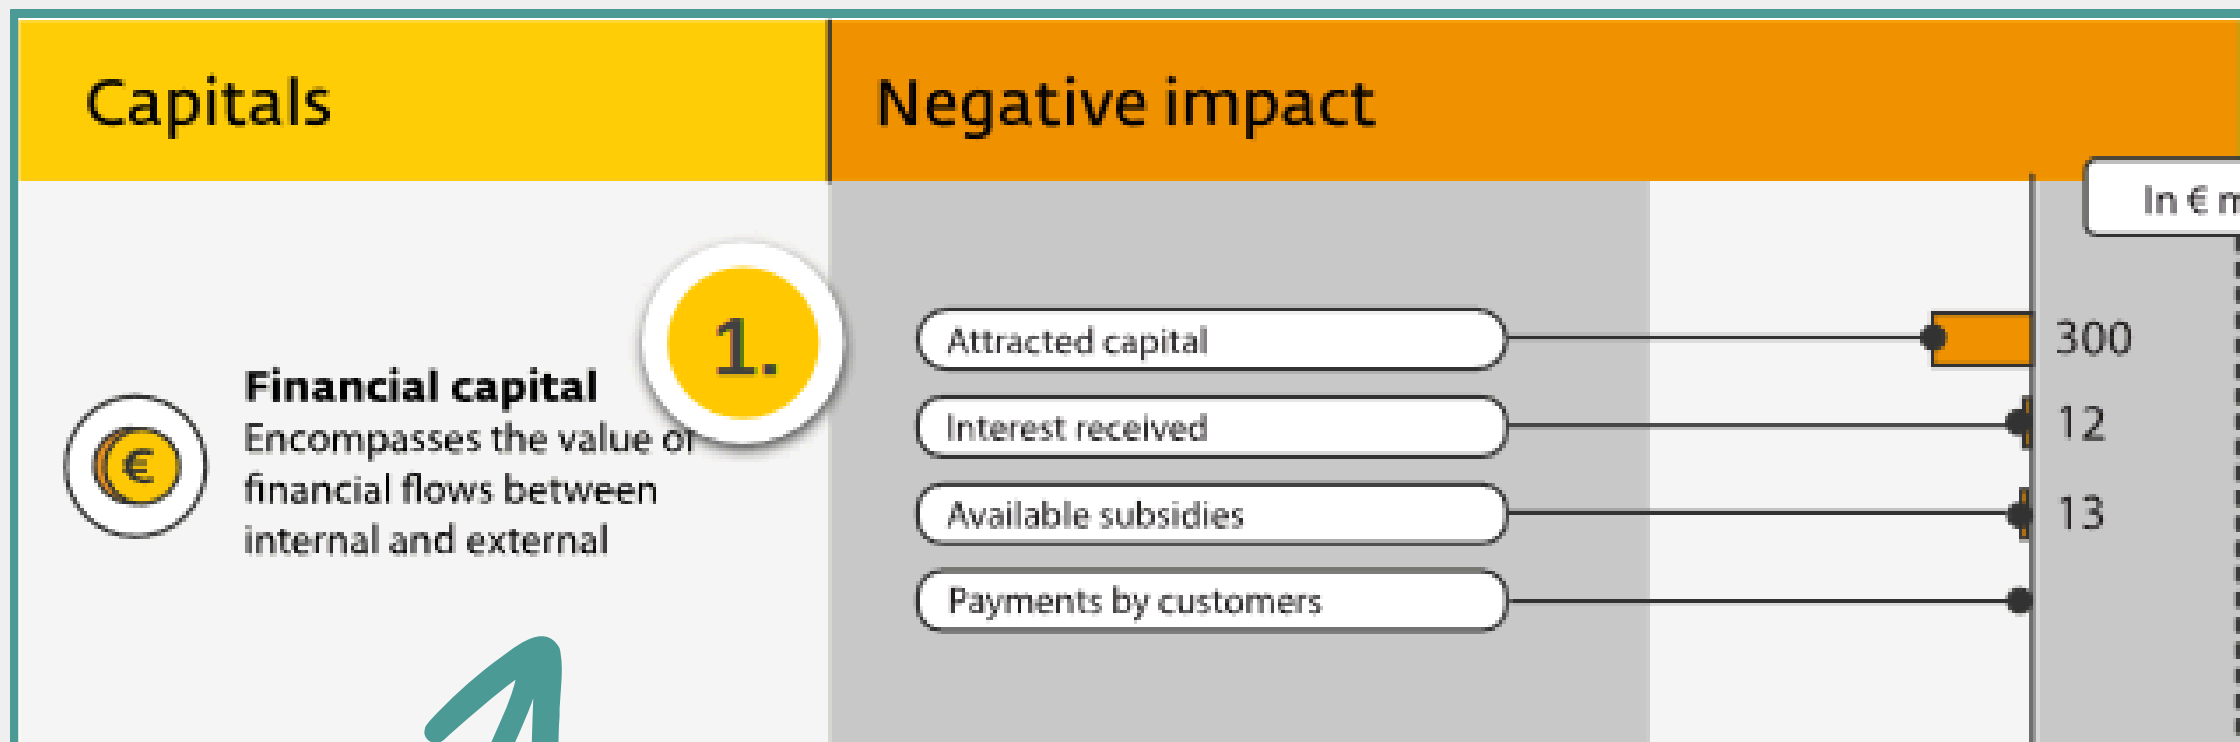

# IP&L OVERVIEW OF GASUNIE

Have a closer look!

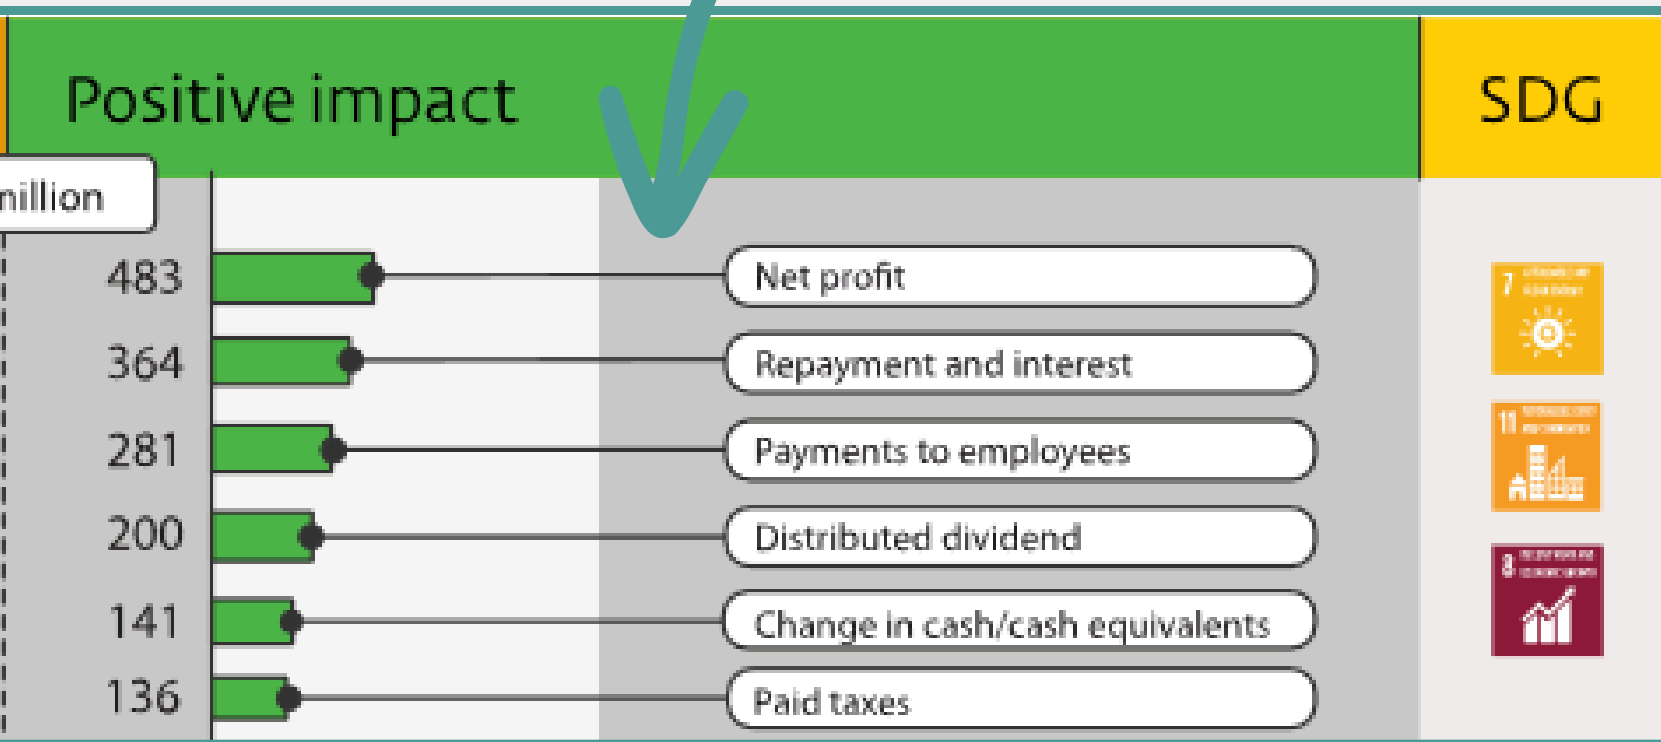

# FINANCIAL CAPITAL OF GASUNIE

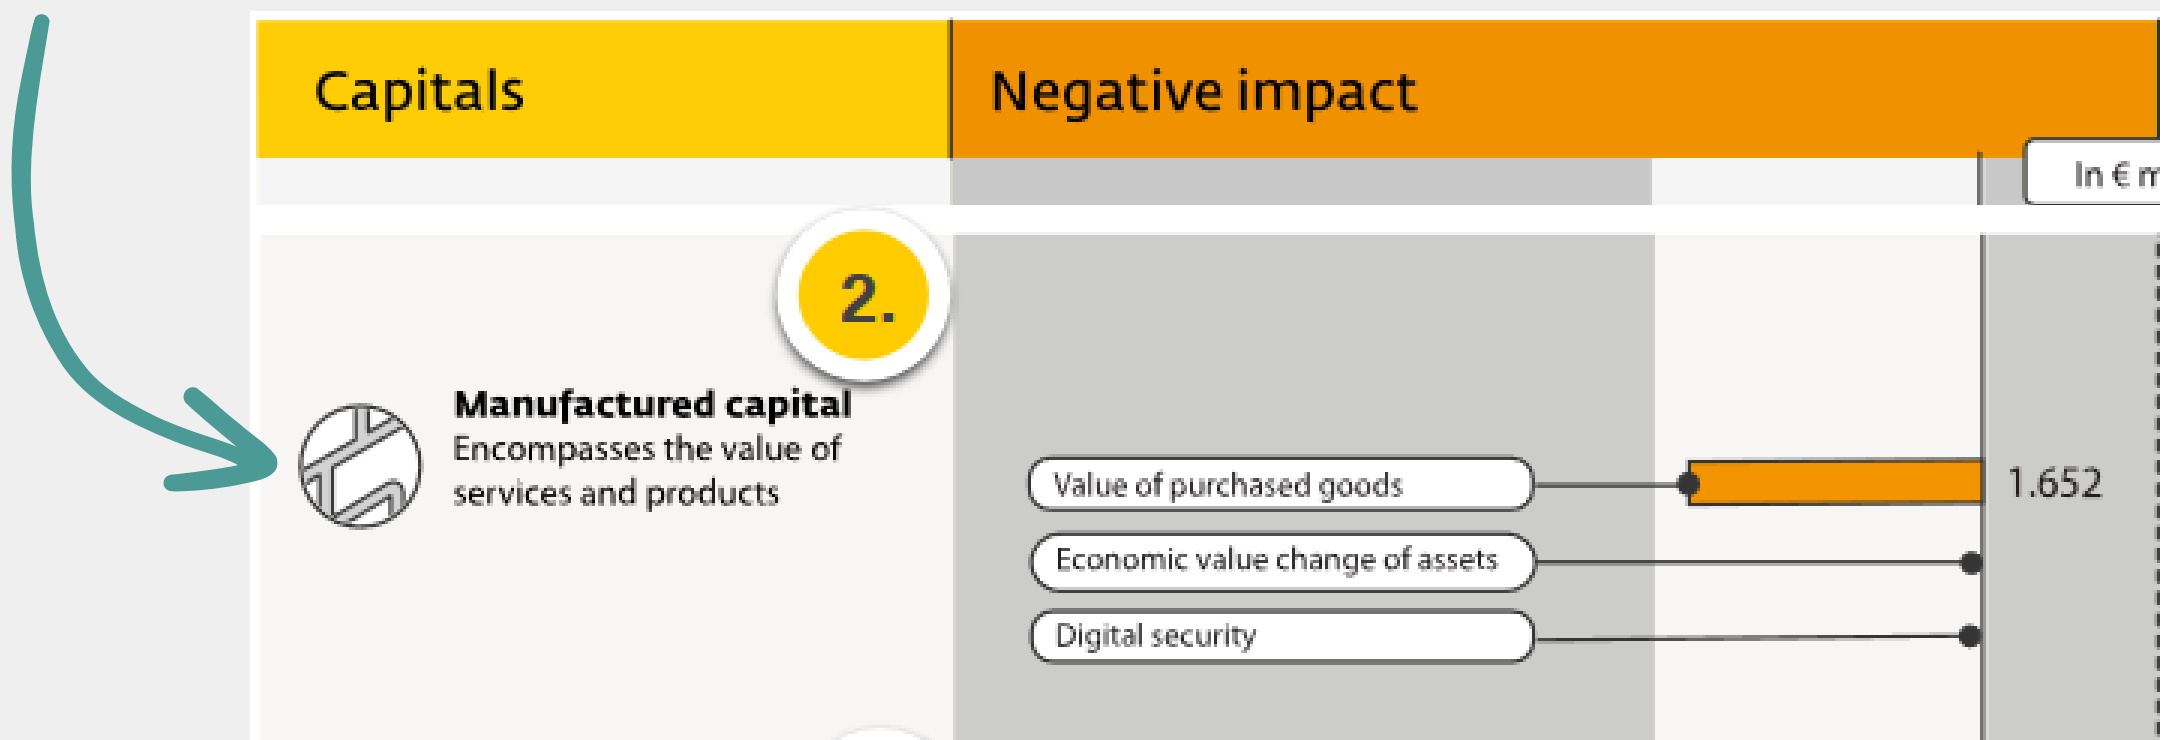

Stakeholder groups include governments, the organisation, investors, employees, suppliers and customers

Expenditures to other parties has a positive impact. For example, paying taxes is beneficial to the broader population.

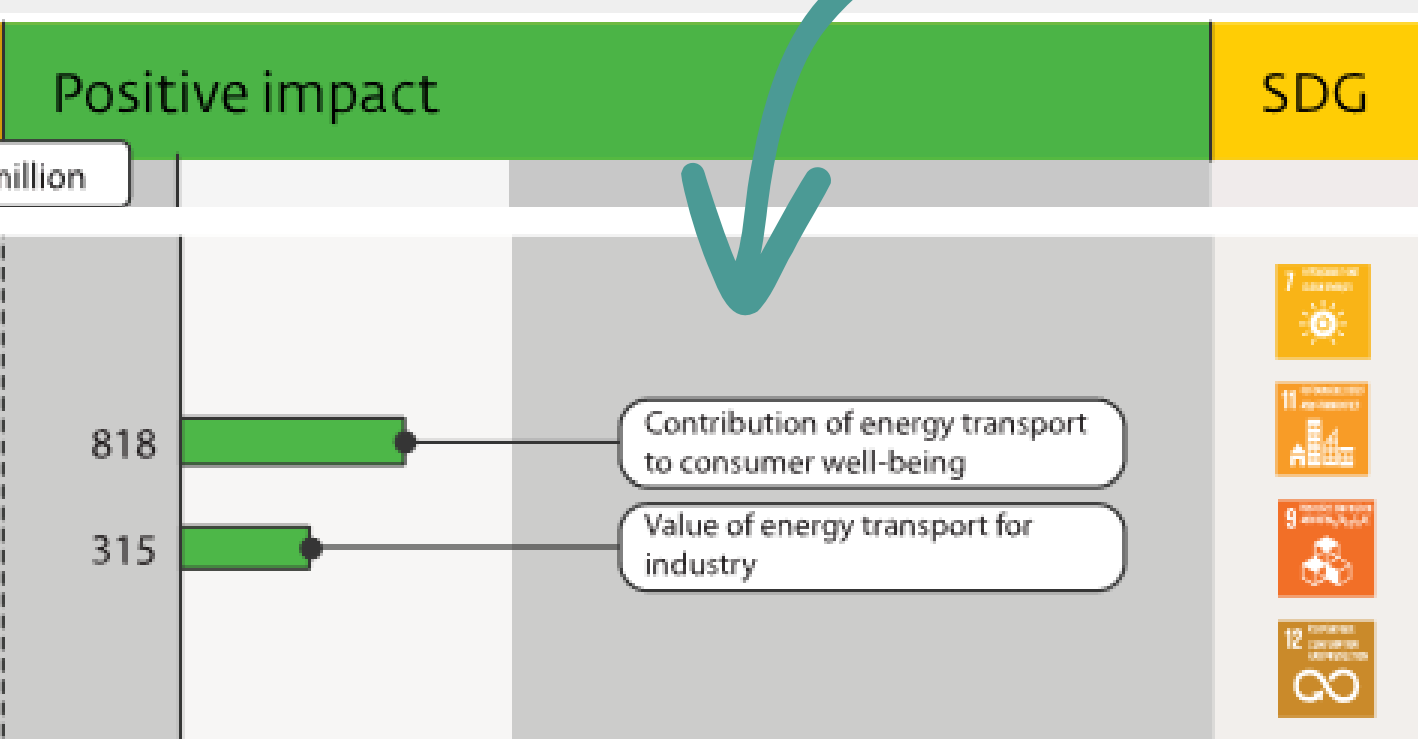

# MANUFACTURED CAPITAL OF GASUNIE

Reliable energy access provides considerable value to society, for example by ensuring warmth during winter in households and facilitating uninterrupted operations for industrial enterprises. In 2023, Gasunie's contribution to this amounted to €818 million for residential users and €315 million for businesses in its primary markets.

A key indicator is the representation of the difference between the perceived value of gas and its price.

## Value to Society

# MAIN TAKEAWAYS

1

## ***Integrated Value Assessment***

Gasunie gains comprehensive insights into its activities by evaluating the impacts of its activities across diverse capitals, fostering a holistic understanding of its value creation for society.

2

## ***Decision-Ready Insights***

The valuation of impacts allows for comparisons and prioritization between projects. This means the Gasunie can more effectively assess and mitigate potential negative environmental and social impact, ensuring support to those that can confirm strong commitment to environmental and human rights.

3

## ***Harmonized impact language***

The comparability of impacts, facilitated by the monetary valuation of impacts, serves as a central element in enhancing communication among various stakeholders.

4

## ***Collaboration***

Gasunie works together with partners in the sector to learn and pilot instruments for impact management, such as a discounted value flow model.
